# Gartner®

"AODOcs is a privately held company based in Atlanta, Georgia, U.S. Its offering, also called AODOcs, is a full CSP on top of Google Drive, and has additional document management features such as metadata management, workflow, and governance. Key geographic markets are North America, followed by Australia and New Zealand. Key vertical markets are manufacturing, government and life sciences (for which a SaaS-regulated electronic document management system satisfies GxP validation requirements).

## Strengths:

- An extensive set of document management, workflow and governance capabilities enables AODOcs customers to exploit Google Drive and G Suite content storage and services.
- According to reference customers, AODOcs' solution is easy to implement, with lower deployment cycle times than most traditional offerings.
- AODOcs is a true SaaS solution, and thus provides clients with a continually evolving platform in the cloud. This benefit, combined with a compelling price, makes AODOcs a good choice for small and midsize enterprises looking to standardize on Google's cloud technologies."

**At AODOcs, it's  
our mission to  
revolutionize the  
way people work.**
