

Transform Google Drive into a Powerful Document Management System

In a world of digital transformation, cloud based collaboration is key. Many products offer such a capability, yet few deliver against the real needs of large enterprises: flexible collaboration with underlying control to ensure compliance without disrupting the user experience. That’s where AODOcs fits in.

AODOcs Cloud Content Services Platform

A low code environment to build:

 Content-rich applications	 Powerful automation and workflows	 Business applications with comprehensive security and compliance capabilities
----------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------

A Platform Built for Business - and Business Users

G Suite

- Designed for the individual
- Bottom-up approach focuses on personal users
- Designed for easy sharing and collaboration

AODOCS

- Designed specifically for Business Enterprise
- Top Down approach to handle large teams and volumes
- Adds strong Compliance, Security, and Traceability focus to collaboration

Benefits

96.4%

Companies Thrive on AODocs Platform

“By migrating from Sharepoint to Google Drive and AODocs, we were able to migrate more than 1 Million Documents and 5,000 users, shutting down 20 servers - in under 11 months.”

Jeremy Tran,
 Head of Digital Collaboration, Essilor International
